About This Game

Note: The game can be played completely with controller. You only need mouse & keyboard to set the game settings in the game launcher!

Tower Miners is a local multiplayer game. It is a genre mix of strategy, tower defense and some random party game elements.
The Goal is to destroy your enemys base.
To do so you will have to:

::Mine Minerals::
but take care, you will slow down by the amount of minerals you carry

::Pick Up Gold Minerals::
you will instantly pick up the full amount of them without a need to mine them

::Pick Up Some Goodies::
randomized items, some can be activated & some get activated instantly

::Build Counter Units::
they will follow a straight path to your enemys base

::Upgrade Your Hero Or Base::
walk Faster, Mine Faster, Build Faster

Also I am very looking forward to your guys ideas round about that game. It would be very nice to read some of your ideas in the Community Forum to improve the game by time.

charters towers miners football. miner tower damage. tower miners steam. tower miners. milners tower 50p. charters towers miners draw. miners bank tower city. charters towers miners rugby league. charters towers miners junior rugby league

The LT button in the input menu, which controls the crate powerup menu in game, can only be mapped to a controller axis, which im guessing is not intended as it makes it mess up. Not a deal breaker though as the game can and should still be played. The premise of a co-op head to head is nice, and while it lacks a little bit of variety in units and in collectables the game can still get tense.
